FULL STACK DEVELOPER

Permanent Full Time

Start Date: As soon as possible

Position

Summary:

Advanced working knowledge/experience 8+ years in design, development, delivery and management of modern web applications (using PHP, HTML/CSS, JS)

Maintaining and version updating features of online program that supports multiple manufacturers with thousands of simultaneous clients/users.

Responsible for establishing and implementing technical planning and ability to lead all aspects of technical development.

Communicate clearly at all levels: corporate, business, and end user clients with new product development and deployment. Must speak fluent English.

Responsibilities:

- Management of program code for ACC ACC software design development, version release, documentation, and testing.
- Ongoing maintenance including proper application of methodologies, best practices, security and quality assurance.
- Plan and coordinate installation and upgrading of hardware and software, programming and systems design; provide technical support to team members.
- Provide accurate estimates for projects assigned including the scope and tracking of project timelines. Identify and communicate early any issues impacting the project timelines and deadlines. On-time delivery of time sensitive projects is paramount.
- Plan and coordinate installation and upgrading of hardware and software, programming and systems design; provide technical support to team members.
- Establish and maintain servers (MS/Linux), ensuring redundancy, backups, securities, firewalls, etc.
- Ability to create technical documentation/reports and execute detailed technology plans that support ACC ACC business strategies.
- Perform other duties as required.
- Ability to safeguard ACC ACC information as confidential.
